

Offer/Funnel/Content SOP

PULSIFY COMPLETE SYSTEM SOP

SECTION 1 — PULSIFY PHILOSOPHY

At Pulsify, we operate with the understanding that clients aren't purposeful in their content, their offers, or their funnels.

And for one thing to be broken means the rest is broken as well, as those 3 pillars are all founders and they flow together in harmony.

We always focus first on the content input and testing through a variety of methods that go well with the creator. Then we build everything accordingly — content → offer → funnel — all aligned and structured through our system.

SECTION 2 — THE PULSIFY ORDER OF OPERATIONS

1. Fix profile (bio, highlights, pfp)
2. Create unique mechanism
3. Build high-ticket or mid-ticket depending on audience
4. Build content pillars
5. Build Profile Funnel

6. Content filming
7. YouTube structure
8. Build landing page (if needed)
9. Write VSL
10. Build Typeform qualification
11. Connect Calendly
12. Build email sequences
13. Tech checks
14. Run tests
15. Collect data → optimize
16. Scale to webinar or paid ads when ready

Very few agencies actually do this right.

SECTION 3 — OFFER CREATION & OPTIMIZATION

3.1 What We Look At FIRST

We look at their engagement — story views, YouTube channel views, Instagram reels views, etc.

Since we mostly work in the biz-op niche, we already know what the ICP looks like.

To create their offer, it's pretty simple. We're very pro high ticket and mid ticket.

We develop a unique mechanism for the client in order for us to create a new approach to sell through.

For high-ticket, we offer a 1-1 mentoring on that instead of it being a Course.

3.2 How We Decide High-Ticket vs Mid-Ticket

After asking the client's viewers a lot of questions — one of them being a financial qualifying question — we see whether or not the creator's audience can afford to invest in a high ticket.

If not, then we proceed to build a mid ticket and upsell from there.

If the client has the budget, we can invest into paid ads to get traffic specifically for high ticket.

3.3 What We Most Often Fix In Offers

We change and revamp profiles entirely. IG bio, profile picture, story highlights.

We change the messaging and make it more clear towards the ICP.

We fix pricing around the ticket since the creator might have limiting beliefs about whether people will pay $2,000. But thanks to our expertise with payment processors and leveraging BNPL, we can easily overcome that.

3.4 Our High-Ticket Delivery Structure

As we did for Trader Gallore:

– 2 weekly 1-1 calls
– 24/7 access to the creator
– Constant accountability
– Audits
– Homework if needed

SECTION 4 — CONTENT AUDIT

4.1 What We Look At Immediately

We look at story views, hooks, video quality (if it's recorded poorly or the script is random), how the creator speaks and positions themselves.

Their consistency to posting these videos and how often they do it. CTA'ing which is very important to master.

4.2 Content Types We Use

Depends on the creator's personality.

If they're a bit or slightly autistic and like to be outgoing, then we can post slightly through the flashy lifestyle without looking like degenerates.

But usually it'll be value driven — we give the viewers trust and credibility. We teach them exactly how to go through the mud themselves. If the creator has testimonials, we leverage that by having virtual meetings with the students.

4.3 Our Rule For High-Converting Content

Absolutely owning your piece of content and being nonchalant about what you do because you know you're absolutely legit and you've got nothing to be afraid of.

SECTION 5 — WEEKLY CONTENT SYSTEM

5.1 Posting Schedule

1 reel per day
1–2 YouTube videos a week (depending on their schedule)
Story sequences every day.

5.2 What We Expect Them to Film

We expect the client to sit down and film at least 1 reel
– Headshots talking game and spitting value
– Technical content flipping the camera and showing people how it's really done

YouTube videos will be:
– How to get into [Niche]
– How to make money with [Niche]
– Middle-of-funnel educational content around something complicated ("X" in [Niche])

Stories:
– Student testimonials
– Backstories
– Storytelling (Niksetting style)

SECTION 6 — FUNNEL SYSTEM

6.1 Our Default Funnel (Profile Funnel)

Usually it's been DMs → Call.
But we're leveraging The Profile Funnel where we optimize their Instagram page to look exactly like a landing page — the same way Niksetting does it.

We optimize the bio and add a trigger word like "SBT" and automate it with ManyChat, then the setter takes over.

Content on the main grid will be carousels and flashy pictures.
Reels will include short clips from YouTube when relevant.

As a starter we use the Profile Funnel before clients get big enough for webinars.

6.2 When We Use A Landing Page

Landing page with a Typeform embedded under the VSL where it asks questions to qualify.
If qualified, the prospect gets taken to a Calendly booking link connected via Typeform.
Under that, we include a wall of testimonials.

This is only when we decide a landing page is the main funnel.

6.3 Our VSL Structure

We use a strong hook challenging the viewer's perspective.

It's written to tell a story constituting their pain points and desired outcomes.

We position the creator as someone who's been there and done that — walked in the viewer's shoes and achieved their desired outcome.

Then we bring student examples — people who once struggled and got results after learning the unique mechanism.

CTA is usually:
"Take everything in this video and do nothing about it and stay where you're at, or click and fill the Typeform below to get started on your journey."

SECTION 7 — TYPEFORM STRUCTURE

First Name
Email
IG (Optional)

Phone Number
Age
Current Situation
3 Month Target
Why they're taking action now
Why they want to work with [Creator Name]
If they can allocate funds and invest in themselves if the mentorship solves their problems

(This is the main qualifier to determine HT → MT)

SECTION 8 — EMAIL SEQUENCES WE BUILD

Nurture
Abandoned Call
Post-Call
Launch
Retargets
ALL

SECTION 9 — COPYWRITING RULES

9.1 Our Copy Style

Storytelling, motivational, built with urgency through pain points and scarcity.

9.2 What We NEVER Allow

Pretty much everything
(meaning: anything that kills conversions, energy, authority, or clarity)

SECTION 10 — CTA PHILOSOPHY

We need clients to be very confident that whether or not people cared about clicking the link down below or wanted to opt in — we're still confident that what we do works.

At the end of the day we're doctors inside of a hospital and people only come to us when they're sick and need treatment.

We only give them the treatment after we diagnose them.

And we can't give them a treatment for different kinds of illnesses.

If that made any sense.

ALL

SECTION 9 — COPYWRITING RULES

9.1 Our Copy Style

Storytelling, motivational, built with urgency through pain points and scarcity.

9.2 What We NEVER Allow

Pretty much everything
(meaning: anything that kills conversions, energy, authority, or clarity)

SECTION 10 — PAID ADS STRATEGY

10.1 When We Use Paid Ads (2 Routes)

Route 1: Either the creator has cooked leads or nearly dead traffic.

Route 2: Creator wants to scale aggressively.

10.2 How We Run The Ads

The way we run the ads mainly is towards the profile funnel.

We usually run the ad creatives towards the profile and usually the CTA is follow me to learn everything I know for free and then from there we get them to opt into

our dms and we capture them from there and try to convert them.

This way we're getting a very low cost per lead and cost per profile view.

This helps the creator gain more qualified followers and buy their trust.

10.3 The Long-Term Conversion Game

And it's a long term game where we are selling them through content and constant story sequences that we post on Instagram.

We also leverage Niksetting's Appointment setting SOP as previously sent.

And that is the whole conversion process that happens either via DM or via them constantly being fed the content and all of that to get them to buy from the creator after knowing them and trusting them.

Maybe they won't buy today but after 60 days they can be convinced that they want to be part of the success and make something for themselves.

And that's when they can opt in.

And that's all the ads about for now.

10.4 When We Scale To Webinars

If the client had a massive following and he had a very big budget we can put it towards a webinar and that's that.

SECTION 11 — CTA PHILOSOPHY

We need clients to be very confident that whether or not people cared about clicking the link down below or wanted to opt in — we're still confident that what we do works.

At the end of the day we're doctors inside of a hospital and people only come to us when they're sick and need treatment.

We only give them the treatment after we diagnose them.

And we can't give them a treatment for different kinds of illnesses.
